- To date:
 - 1,494 recovered cases;
 - 19 deaths; and
 - 1,675 total confirmed cases.

Updated Reporting Strategy

Beginning tomorrow December 1, a new COVID-19 Data Dashboard will be available on the Chautauqua County Health Department website, and the timeline for case reporting will be modified.

COVID-19 Dashboard

A new dashboard will be available on the Chautauqua County Health Department webpage. The dashboard will include a summary of recent COVID-19 data including: total cases, new cases, new deaths, active cases, total recoveries, current local hospitalizations, total deaths, quarantined contacts, quarantined travelers, active cases by ZIP code, and the most recent 7-day rolling average percent positivity rate from the NY Forward website. A demographic breakdown of total cases will be available including age group, sex, presence/absence of symptoms, and fatality rates by age group.

There will be no changes to the Chautauqua County COVID-19 map reporting process at this time. A link to the map will be available on the dashboard webpage.

The dashboard will be updated to include the prior day's numbers by 1 p.m. Monday through Friday with the exception of holidays.

Timing of Reports

Up until this point, our daily reports included the number of cases confirmed that day.

Moving forward, we will report the number of cases confirmed on the prior day. This change in process will improve staff efficiencies, and our numbers will more closely align with those reported on the NY Forward webpage, though there will still be discrepancies due to our more thorough investigation of reported positive cases.

With this new change, the full report provided on Mondays will include numbers for Friday, Saturday, and Sunday. Previously, Monday reports included numbers for Saturday, Sunday, and Monday.

Daily Reporting

Standard daily press releases/Facebook notifications of data will no longer be issued. Anyone looking for the most recent COVID-19 numbers can visit the Chautauqua County COVID-19 webpage:
