

## COVID-19 Statistics for January 16-January 22, 2022

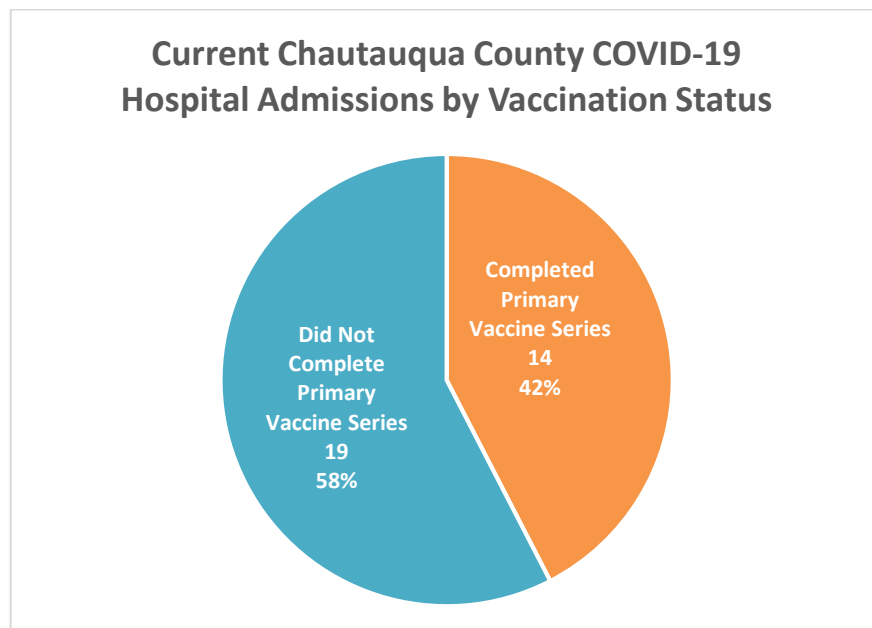

(updated at 9:15 on 1/26/22)

**1/26/22:** Please note that we will no longer be reporting active cases and close contacts on the dashboard. Because of the changes to isolation and quarantine protocols, cases are closed more quickly than they were in the past. With the changes to contact tracing, fewer contacts are being reported to the department. These figures no longer accurately reflect cases or contacts in the community. Additionally, because more cases are being detected with at-home rapid tests, and we are not always aware of the results, it should be noted that the total case counts reported here reflect the minimum and not the total amount of cases experienced in the community. The “7-day average percent positive” figure (from the New York Forward webpage) only includes results reported by laboratories, and does not include any rapid test results. “New cases this week” and “Total cases” do include rapid testing results that have been reported to us via our website.

Total Cases	New Cases This Week	New Deaths	Total Recovered	Currently Hospitalized	% Did Not Complete Primary Vaccine Series in Local Hospitals <sup>^</sup>	Total Deaths	7-Day Average % Positive*	CDC Level of Community Transmission
24531	1653	5	24044	33	58%	295	14.9%	HIGH

<sup>^</sup>This number includes all people currently hospitalized in Chautauqua County facilities, and does not include residents who are hospitalized outside of Chautauqua County
